

# Moveable Walls

## A Steelcase Seminar

Designers  
Course Number: 8347  
Units: 0.1

Architects  
Course Number: SC0507  
Units: 1

Private spaces are constructed in buildings every day. Traditional, fixed construction does a fine job meeting the initial needs of a space. Moveable walls are a flexible, sustainable, cost-effective alternative to traditional construction. This course is an opportunity to learn how moveable walls not only provide a solution with built-in flexibility, but also provides first-cost effective alternatives to conventional construction that simplify the planning and construction process. A solution that considers life-cycle costs and the inevitability of the needs of a space changing all while being considerate of the earth as well.
